SUMMARY

Computer Science student building practical backend systems with Python, Django, REST APIs, database design, testing, and maintainable architecture. Looking for a Junior Backend Developer role to contribute to real-world backend systems while learning from experienced engineers.

TECHNICAL SKILLS

Intermediate: Python, Git, Django, REST API, Unit Testing

Basic / developing: Redis, PostgreSQL, SQL Server, MySQL, Celery, Docker, Locust

Backend: Django REST Framework: authentication, permissions, serialization, validation, filtering, pagination

Tools: Docker & Compose, Redis caching, Celery background tasks, Pytest, Locust load testing

Languages: Persian (Native), English (Upper Intermediate)

PROJECTS

Ecommerce Platform *Public repository*

Django · DRF · PostgreSQL · Redis · Celery · Docker · Pytest

- Full-featured ecommerce backend covering products, categories, carts, orders, checkout, reviews, authentication, and permissions.
- Worked on REST API architecture, cart and cart-item workflows, order and checkout logic, stock validation, review workflows, Redis and Celery integration, and automated testing.

API Latency Lab *Public repository*

Django · PostgreSQL · Redis · Celery · Docker · Locust

- Performance-focused lab for understanding how implementation and infrastructure choices affect API latency.
- Worked on database performance experiments, Redis caching, pagination, sync vs. async endpoints, background task processing, and load testing with Locust.

Library Management System *Private repository*

Django · DRF · PostgreSQL · Redis · Docker · Pytest

- Workflow-focused backend for books, authors, publishers, loans, reservations, and users.
- Role-based access, user roles and permissions, loan and reservation workflows, REST APIs, and automated testing.

Core — Blog & Comment API *Public repository*

Django · DRF · JWT · Celery · Docker

- Blog and comment API with JWT authentication, comment workflows, background tasks, and Docker deployment.

ToDoApp *Public repository*

Django REST Framework

- Django REST API focused on core CRUD operations and fundamental API concepts.

EDUCATION

Bachelor's Degree in Computer Science

2025 — Present

Islamic Azad University, Tehran East

Network & Software

Technical/Vocational High School.

COURSES & CERTIFICATES

- **Python Fundamentals** — Doreh Academy (certificate)
- **Microsoft SQL Server** — Maktabkhooneh, 50 hours
- **Docker Training for Developers and DevOps Engineers** — Maktabkhooneh, 10 hours
- **Advanced Django** — Maktabkhooneh, 24 hours
- **Django Programming & E-Commerce Development** — Maktabkhooneh, 20 hours
